-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. This is responsive to the amendment filed on 9/2/04.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4 and 6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bricaud et al. (USPN 5,980,323) in view of Kwiat et al. (USPN 5,746,626).

Bricaud discloses a contact assembly comprising : a dielectric mounting block (11) having inner and outer faces ;and a conductive contact (16) unitarily formed of elastically deformable metal with a center web (38) set in the block and formed with a cutout (80); an inner leg (34); an outer leg (30) having a tip (32) and elastically deflectable from an outer position spaced well outward of the outer face and spaced from the web to an inner position with the tip extending at least partially inward through the cutout and past the web (col. 5, lines 13-17). Bricaud does not explicitly disclose that the inner leg elastically deflectable toward the center web. Kwiat, however, teaches such an inner leg (32). Therefore, it would have been obvious to one skilled artisan at the time the invention was made to include the teaching of Kwiat in the Bricaud connector assembly so that the leg can be configured to bent in a second direction or in any other direction as needed; wherein the contact is formed with inner and outer U-shaped bights connecting the respective legs to the web; wherein the block is formed on

the outer face with an abutment (74) the outer leg having a tip (24) bearing outward on the abutment (74).

4. Applicant's arguments with respect to claims 1-4 and 6-10 have been considered but are moot in view of the new ground(s) of rejection.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xuong M. Chung-Trans whose telephone number is (571) 272-2002. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley can be reached on (571) 272-2800 extension 33.. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
